

# **Aliso Creek Watershed Quarterly Report** ***(Recently Completed)***

## Water Quality

### Aliso Creek Watershed

In response to the Bacteria Total Daily Maximum Load (TMDL) promulgated by the SDRWQCB, staff is continuing participation in the collaborative development of a Comprehensive Load Reduction Plan (CLRP) for the Aliso Creek Watershed. While the TMDL requires the development of a Bacteria Load Reduction Plan, the south Orange County Permittees affected by the TMDL are proposing to develop a load reduction plan that contemplates additional priority pollutants that can affect the watershed.

### Aliso Creek Directive

The City submitted the 43rd Quarterly Progress Report in general accordance with the requirements of the San Diego Regional Water Quality Control Board (SDRWQCB) on January 24, 2012. Noteworthy items of this reporting period included:

- Participated in coordination meeting for interim hydromodification controls and development of the Hydromodification Management Plan (HMP) submittal to the SDRWQCB
- Participated in South Orange County Watershed Management Area Management Committee

In addition, the City submitted a supplemental report to the SDRWQCB summarizing the Aliso Creek monitoring program and data evaluation of priority drains on March 1, 2012.
